EXPERIENCE

Frontend Developer G6, **Rubrik**

July 2021 – ongoing | Bangalore, Karnataka

As a part of Core UI team, I am undertaking the projects which enable Rubrik customers to move to our Next-gen Polaris SaaS platform, optimising performance for Polaris platform and improving process for development.

- Managed medium and large-scale projects from inception to completion, encompassing UX review, task breakdown, estimation, coding, testing, and documentation.
- Led core and complex projects facilitating user migration from individual control panels for each Rubrik appliance to the Polaris SaaS platform, enabling centralized control over all Rubrik appliances from a single platform.
- Enhanced the testing process and introduced unit testing practices to enhance the codebase.
- Implemented lazy loading for the Polaris SaaS platform, reducing chunk size by 30% and boosting performance by 20-30% during the initial load.
- Automated the UI component package publishing process, enabling package publication with a single click through the pipeline. This capability empowers the internal platform team to utilize common Rubrik UI components seamlessly.
- Guiding full stack developers to implement UI complex feature and mentor new joiner
- Consistently performing code reviews for the assigned UI area and as a reward got an Awesome reviewer tag
- Tools: *React.js, Redux.js, EmotionJs, GraphQL, StoryBook, Jest, React testing library, Highchart, Sentry.lo*

UI Developer, **ThoughtWorks**

June 2019 – July 2021 | Pune, Maharashtra

BharatSim — Client: Thoughtwork & Ashoka University

Developed a framework for visualization of Epidemic curves, model debugging and creation of dynamic dashboards of epidemic curves
